Orkila extends North African footprint

Orkila's expansion into North Africa takes another step forward today!

Following last year's reinforcement of its West African network, the Orkila Group is pleased to announce the creation of its new affiliate, **ORKILA TUNISIE**, located in the capital Tunis, which is not only the political heart of the country but also the centre of its commercial activities.

Over the last three decades the Tunisian economy has developed impressively and it is against this background that **ORKILA TUNISIE** will offer, to customers and suppliers alike, a solid foundation for the growth and development of their interests.

With this latest move, Orkila reinforces its established position as the leading chemical distributor in Africa & the Middle East through its network of affiliates based in the key markets of the region, including Morocco, Algeria, Egypt, South Africa, Nigeria, Ivory Coast Senegal, Lebanon, Syria, U.A.E., Jordan, Iran & Pakistan.

We would like to take this opportunity to thank all our business partners, together with those working for Orkila affiliates throughout the region, for their continued support; and to invite anyone connected with the chemical industry to visit our web site at www.orkila.com
